

Eco-77

Strain 77 of the fungus *Trichoderma harzianum* protects pruning wounds on grapevines against *Eutypa* infection and pruning wounds on tomato and cucumber crops grown in plastic tunnels against *Botrytis* infection

Warnings

- Keep out of reach of children, uninformed persons and animals
- Store in a cool place away from chemical pesticides. Optimum storage temperature is 10 – 15°C.
- May cause slight eye irritation
- May cause allergic reactions in sensitive persons

Precautions

- Remember you are working with a living organism
- Do not use after the expiry date

Although this inoculant has been tested under a variety of conditions, the supplier does not warrant that it will be efficacious under all conditions. Because the active agent is a living organism, its action may be affected by storage, handling or climatic conditions.

This naturally-occurring organism should not cause damage to crops, vegetation, and the environment or harm to man and animals. However, in the unlikely event of this happening, the supplier does not accept responsibility for any damage that may occur.

Hoewel die inokulant onder 'n wye verskeidenheid van toestande getoets is, waarborg die verskaffer nie dat die produk effektief in alle omstandighede sal wees nie. Omdat die aktiewe bestanddeel 'n lewende organisme is, word dit soms deur berging, hanteering, klimaat en grondtoestande geaffekteer.

Die natuurlike organisme behoort nie skade aan mense, diere, gewasse, plantegroei of die omgewing te doen nie. In die onwaarskynlikheid dat dit wel gebeur, aanvaar die verskaffer nie verantwoordelikheid daarvoor nie.

- Moet nie na die vervaldatum gebruik nie
- Moet nie meng in houers wat voorheen vir toksiese middels gebruik was nie. Was die houers goed met seep en water voor gebruik
- Gebruik binne 6 uur na meng
- Moet nie met enige ander chemiese landboumiddels meng

- sonder om u verkoopsteenwoordiger te raadpleeg nie.
- Skud of roer die mengsel dikwels gedurende gebruik
 - Moet nie die poeier of mengsel in die son laat staan nie
 - Voorkom inaseming van die stof
 - Was hande met seep en water voordat u eet, drink of rook
 - Moet nie gebruik onder uiterste toestande nie. dws bo 35°C of by grond /water pH onder 3 of bo 8

Gebruiksaanwysings

Menging: Meng teen een gram per twee liter water. Meng eers die regte hoeveelheid poeier met 'n bietjie water voordat u die res van die water byvoeg

Bespuiting: Spuit vir volle plant bedekking of spuit net die snoeiwonde onmiddellik na elke snoei

Eco-77

Isolaat 77 van die swam *Trichoderma harzianum* beskerm snoeiwonde op wingerdstokke teen *Eutypa* infeksie en snoeiwonde op tamatie en komkommer gewasse in plastiese tonnells teen *Botrytis* infeksie

Waarskuwings

- Hou buite bereik van kinders, oningeligte persone en diere
- Bere in 'n koel plek weg van chemiese middels. Optimale temperatuur is 10 – 15°C
- Mag ligte oog irritasies veroorsaak
- Mag 'n allergiese reaksie in sensitiewe persone veroorsaak

Voorsorgmaatreels

- Onthou u werk met 'n lewende organisme

- Do not mix the fungus with any agrochemicals without first consulting your sales representative
- Do not leave the powder or mixture standing in the sun
- Avoid inhaling the dust
- Do not use under extreme conditions i.e. above 35°C or at water pH less than 3 or higher than 8
- Wash hands with soap and water before eating, drinking or smoking

Directions for use

Mixing: Mix at a rate of one gram per two litres of water. Mix the required amount of the powder to a thin paste with a small amount of water first before adding to the remaining water.

Spraying: Apply as a full cover spray or as a directed spray onto each pruning wound immediately after each pruning.

- Do not mix in containers that have previously been used for toxic substances. Wash the containers well with soap and water before use
- Use within 6 hours of mixing
- Shake or stir the fungus mixture frequently during use to avoid settling out of the product.
